Age 30, Married

Phone:  +375 29 552-73-41

Email: radzkov@gmail.com

Skype:  paulradzkov

Website:  paulradzkov.com

GitHub username:  interpaul

## About

I became interested in web design in 2004. First as a freelance designer drew corporate websites for small firms, and then mastered HTML/CSS and started to make websites "turnkey". From 2005 to 2009 worked as the head of the Center of designing content in university.  There I developed e-learning materials, created and maintained a website of the university, was engaged in the integration of web technologies into the learning process, was managing team of 3 members.

Since 2009 until Nov 2013 I worked as a front-end developer in Belitsoft. I've been creating websites for Joomla, developing prototypes of interfaces for web applications and the company's products, graphic design. Since 2010 I am Team Lead and Head of Front-end department (up to 5 members).

At November 2013 I moved to dedicated team of IDT Corporation as Executor Project lead. My current responsibilities: manage working activities with the team (2 UI designers and 2 Front-end developers), UI design and implementation, integration into .Net environment.

I am interested in new trends in graphic design, typography, ergonomics and user interaction, infographics, business ideas, branding and identity.

Before web development studied drawing (watercolor, graphics).

## Professional goals

To became a Full Stack Web Developer, to create products from concept to completed solution. I would like to be engaged into UI/UX, graphic design in near future.  Later I'm going to improve my JavaScript skills.

## Tools and Technologies

| | |
|---|---|
| HTML/CSS | **expert** |
| Photoshop, Fireworks | **advanced** |
| JavaScript | **intermediate** (creating UI elements) |
| PHP, Ruby, .Net, GIT, Node.js | **basic** (run my personal blog at node.js platform) |
| English | **intermediate** (not expecting problems in communications) |

## Experience

**Responsive design** — Mobile First, Progressive Enhancement

**Prototyping of web applications** —UI/UX

**Front-end Development** — HTML/CSS/JavaScript, CMS templates

**Visual design** — Ads, collages, icons, graphic and brand design

**Project Management** —Managing team up to 5 members

## Education and Career
